

Soluble fertilizer with high Sulphur trioxide content and a balance NPK nutrition

Composition	WV	w/w
Nitrogen (N)	88g/L	6.6%
Phosphorous (P ₂ O ₅) Water Soluble	90g/L	6.8%
Potassium (K ₂ O) Water Soluble	92g/L	6.9%

Ready to use liquid fertilize high concentrated in Sulfur. It prevents and corrects deficiencies in Sulfur for all crops by foliar application and improves the protein rate of crops.

KEY FEATURES AND EFFECTS ON CROPS

1. Balanced Nutrient Supply

The balanced NPK ratio makes this fertilizer ideal for general use, promoting healthy growth, roots, and fruit or flower development.

2. Liquid Form

Provides faster nutrient uptake through roots or foliage and is easy to apply via drip irrigation, foliar spray, or fertigation systems.

3. Water-Soluble Nutrients

All three major nutrients are water-soluble, ensuring high availability, efficient absorption, and reduced leaching losses.

AGRONOMIC INTEREST

- Improves root and leaf development
- Optimizes the Nitrogen - Sulfur synergy and therefore grain feed quality.
- Increases the quality and the yield

RECOMENDED

BRASSICA (*rape, cabbage...*)

Rate: 3-4 L/ha - Maximum concentration : 6%

CEREALS

Sulfur deficiencies Rate: 3-4 L/ha - Maximum concentration : 8%
