

Bhu-LimeTM ORGANIC

LITERATURE

Composition	W/V
Calcium (Ca)	39.00%
Magnesium (Mg)	1.00%
SG	1.5
pH6.	8.6 – 9.6

BHU - LIME Organic is a high-quality liquid suspension of micronised lime designed for rapid correction of calcium deficiencies in crops. Its advanced formulation ensures fast absorption, improved nutrient efficiency, and enhanced crop performance.

Key Benefits

- > Corrects calcium deficiency quickly.
- > Improves plant strength and structure.
- > Enhances cell wall formation
- > Boosts crop quality and shelf life.
- > Improves resistance to stress conditions.
- > Promotes better nutrient uptake.
- > Suitable for foliar application and fertigation.

Growth Stages

- Early vegetative stage (for strong plant foundation).
- Flowering stage (to support fruit set).
- Fruit development stage (for quality, firmness & shelf life).

Soil Amelioration / Fertigation

10 – 50 L / ha depending on soil condition (higher for rehabilitation).

Foliar Spray

<i>CROP CATEGORY</i>	<i>RATE OF APPLICATION</i>
Vegetables	1 - 2L / 200 - 400L of water
Orchards & Vineyards	1 - 2L / 200 - 400L of water
Broadacre	1.5 - 2.5 / 200 - 400L of water
Pasture	2 - 3 L / 200 - 400L of water

Suitable For

- > Calcium deficiency (e.g. blossom end rot, tip burn).
- > Weak plant structure or poor fruit firmness.
- > High rainfall areas (nutrient leaching).
- > Sandy or acidic soils with low calcium levels.
- > Rapid growth stages requiring high calcium demand.
