

# EABCL ADMIRE 70 WDG

Imidacloprid 700 g/Kg

**MPS No.:** 3959 **PCPB NO.:** PCPB(CR)1298 **WHO CLASS:** II

**Chemical Sub Group:** Neonicotinoids

**Mode of Action:** Systemic insecticide with trans laminar activity and with contact and stomach action. Readily taken up by the plant and further distributed acropetally, with good root-systemic action.

**Main Group and Primary site of action:** Nicotinic acetylcholine receptor (nAChR) agonists; Nerve action

## DESCRIPTION

EABCL Admire 70 WDG acts as an antagonist by binding to postsynaptic nicotinic receptors in the insect central nervous system.

It is used for the control of sucking insects, soil borne insect pests, termites and some species of biting insects.

## ADVANTAGES OF EABCL ADMIRE

- Its systemic hence reaches all parts of the plant
- EABCL Admire has trans-laminar movement covering the leaves to entirety.
- Its granular nature makes it both easy to handle and safe to users as less dust is produced.
- EABCL Admire fits well in IPM programs when used as soil drench.
- EABCL Admire's metabolites protect the plant from stress due to physiological changes induced in the plants.

## RATE OF APPLICATION

Apply EABCL ADMIRE as a Drench at the rate of 600g/HA/1000 L (4g/ 20 Litre of water)  
Spray 200 g/Ha/Lita 1000(4 g/ 20 Litres of water)

## TIME AND DIRECTION OF USE

Apply treatments when weather conditions favour pests outbreak and repeat at suitable intervals.

## KEY FEATURES OF EABCL ADMIRE 70 WDG

Broad crop and pest spectrum.  
Good reliable control of all major sucking pests.  
High selectivity.  
Quick knockdown action  
Long residual action  
Can also be used for seed treatment.  
Useful tool in pest resistance management

## PRECAUTIONS

**Compatibility:** Do not mix Admire 70 WDG with other chemicals/pesticides.  
Though the product is Non – phytotoxic to most crops and varieties when used at recommended rates; however it is always advisable to do a small Phytotoxicity trails before wide spread application.  
Follow proper insecticide rotation with different IRAC code group for resistance management.
