

EABCL Frost Protect

Beyond Business

Foliar frost protector

Description

Its formulation, based on organic acids, covers the external surface of the plants, blocking the water loss owing to low temperatures and thus minimizing the damages caused by those adverse conditions.

Advantages

- > It prevents frost damages for at least 10 days.
- > It protects the most sensitive parts, such as flowers and fruits.
- > It does not affect the crop and naturally degrades leaving no residues.

Declared contents

Organic Acids	37% w/w
Boron(B)	2% w/w

Packaging

1L, 5L and 25L

Application

A uniform application is required wetting properly all the plant surface.

Dosage

Apply at least 24 hours before expected frosts
Dose of application: 2L/ 100L of water, total volume of application from 400 to 800L of water depending on crop.
