

Glyphosate- Isopropylammonium 410 g/L

HRAC : Group G

WHO CLASS III

PCPB NO: PCPB (CR)1668

**GYPROM 480 SL** is a systemic and non selective post-emergence herbicide for control of a variety of annual, biannual and perennial grasses, sedges, broad leaved weeds and woody shrubs. It can be used in plantation crops, grasslands and non cropped lands.

**Mode of Action**

It is a post-emergence herbicide absorbed through the foliage and translocated rapidly from aerial parts to underground roots, stolons, tubers or rhizomes of perennial weeds. Control of annual weeds begins as soon as the chemical penetrates the tissues. Leaf symptoms appear within 7 to 14 days after application and complete desiccation usually within 30 days.

**Advantages of Gyprom 480 SL**

- > Controls wide range of weeds.
- > Good for use on minimum tillage
- > Also act's as a growth regulator.

**Application Rate of Application**

Crops	Rates of Application	
	Per Hectare	Per 20Litres
Non Cropped area for Maize Planting	3 Litres	200ml

**Before**

**After**
