

Savage 240 SC

Spirodiclofen 240g/L

PCPB NO: PCPB (CR): 2153

Miticide / ovicide for the control of Persea mites in Avocado.

Description

Savage 240 SC is a selective, non-systemic acaricide from the new chemical class of tetrionic acid derivatives. It shows activity against all developmental stages of female adults of tetranychid mite species such as the two-spotted spider mite *Tetranychus urticae*.

Mode of Action

Savage 240 SC is a tetrionic acid derivative that inhibits lipid synthesis in the target pests.

Crops	Insects	Application Rate / Spray Volume / 20L	Timing of Application
Avocado	Persea mites	0.5L /Ha/ 2000 spray volume / 5ml/ 20 litres water	Spray once when in vegetative / fruiting stage
Roses	Spidermites Aphids and Whiteflies	500 mL /Ha/ 1000 spray volume, 10 mL/ 20 litres water	Spray when the pests appear and repeat at 10 days interval if necessary. A maximum of 3 applications are recommended per season.

Benefits of Savage

- > Broad-spectrum acaricide.
- > Has a good killing effect on harmful mites' eggs, young mites and nymphs.
- > IPM compatible with anthocorid safety.
- > Unique mode of action.

Time of Application

Apply when weather conditions are favorable for pests outbreak and continue until the threat of pests has passed. Repeated applications at suitable interval are necessary to protect new plants growth and as conditions becomes unfavorable for pest develop, reduce the spray interval.

TOXICOLOGICAL INFORMATION:

Symptoms of poisoning: These include apathy, myatonia, tremor, difficult breathing and myospasms. Antidote: No known antidote, Treat symptomatically. Note to the physician: Apply symptomatic treatment, Monitor blood pressure and pulse rate frequently.
