

CONVOY 20% SC

CHLORANTRANILIPROLE 200 G/L

IRAC (Insecticide Resistance Action Committee) code: 28

Description: **CONVOY 20% SC** is Insecticide for the control of Caterpillar on Roses and Carnations; African Boll Worn on French beans and Tomatoes; Fall Army Worm on Maize, Diamond Back Moth on Cabbage and perseas mites on Avocado.

Mixing instructions: Mixing instructions: Half fill the spray tank with water. Add the required amount of **CONVOY 20% SC** then fill the water to the required level and agitate thoroughly to uniformity. Spray immediately after mixing.

ADVANTAGES OF CONVOY 20% SC

1. Provides highly effective control of Lepidopteran larvae and other chewing pests.
2. Has a novel Group 28 mode of action that helps manage resistance.
3. Offers long residual activity, reducing the number of applications needed.
4. Causes rapid feeding cessation, preventing crop damage quickly.
5. Shows low toxicity to mammals, beneficial insects, and pollinators when used as directed.

CHLORANTRANILIPROLE 200 G/L

Category	Information
Site of Action	Activation of the ryanodine receptors in the calcium release channel, leading to contraction and paralysis.
Spectrum and Route of Action	Systemic insecticide with activity primarily by ingestion and secondarily by contact, translocated acropetally in the xylem, translaminar mobility. Insects exhibit general lethargy and muscle paralysis, rapidly stop feeding and ultimately die.
Uses (Crops & Pests)	Fruit: Lepidoptera, Coleoptera, Diptera, Isoptera Vegetables: Lepidoptera, Coleoptera, Diptera, Isoptera Vines: Lepidoptera, Coleoptera, Diptera, Isoptera Cotton: Lepidoptera, Coleoptera, Diptera, Isoptera Sugar cane: Lepidoptera, Coleoptera, Diptera, Isoptera Rice: Lepidoptera, Coleoptera, Diptera, Isoptera Grass: Lepidoptera, Coleoptera, Diptera, Isoptera
