

PRIORI 25 SC

AZOXYSTROBIN 250G/L

FRAC (Fungicide Resistance Action Committee) code: II

Description: EABCL Priori 25SC (Azoxystrobin 250g/L) is a broad-spectrum systemic fungicide for the control of Powdery mildew in Roses; Downy mildew in Basil and Broccoli and Rust in French beans.

Mixing instructions: Half fill the spray tank with water. Add the required amount EABCL Priori 25 SC then fill the water to the required level and mix or agitate thoroughly to uniformity. Spray immediately after mixing.

ADVANTAGES OF PRIORI 25 SC

- 1. Broad-spectrum protection** against many fungal diseases.
- 2. Strong preventive activity** that stops infections before they start.
- 3. Systemic movement** in the plant for good coverage.
- 4. Long residual effect** for extended protection.
- 5. Improves plant health** by reducing stress and enhancing greenness (“stay-green” effect).

AVAILABLE PACKS

50 ml, 100 ml, 250 ml,
500 ml, 1L, 5L & 20L

AZOXYSTROBIN 250G/L

Category	Information
Site of Action	Mitochondrial electron transport inhibition (MET III) by inhibition of ubiquinol oxidase at the Qo (quinone outside) binding site on cytochrome bc1 (complex III).
Spectrum and Route of Action	Systemic fungicide with protective, curative and eradicant activity, absorbed by roots and leaves, translocated acropetally and by translaminar mobility. Inhibits spore germination and mycelial growth and shows antispore activity.
Uses (Crops & Diseases)	<p>Cereals: Erysiphe graminis, Puccinia spp., Leptosphaeria nodorum, Septoria tritici, Pyrenophora teres</p> <p>Rice: Pyricularia oryzae, Rhizoctonia solani</p> <p>Vines: Plasmopara viticola, Uncinula necator</p> <p>Cucurbits: Sphaerotheca fuliginea, Pseudoperonospora cubensis</p> <p>Potatoes & Tomatoes: Phytophthora infestans, Alternaria solani</p> <p>Peanuts: Mycosphaerella arachidis, Rhizoctonia solani, Sclerotium rolfsii</p> <p>Peaches: Monilinia spp., Cladosporium carpophilum</p> <p>Turf: Pythium spp., Rhizoctonia solani</p> <p>Bananas: Mycosphaerella spp.</p> <p>Pecans: Cladosporium caryigenum</p> <p>Citrus: Elsinoë fawcettii, Colletotrichum spp., Guignardia citricarpa</p> <p>Coffee: Colletotrichum spp., Hemileia vastatrix</p>
