

TYFOS 722 SL

PROPAMOCARB HYDROCHLORIDE 100G/L

FRAC (Fungicide Resistance Action Committee) code: **Propamocarb Hydrochloride 722g/L: 28**

Description: **TYFOS 722SL** (Propamocarb hydrochloride 722g/L) is a Fungicide for the control of Downy Mildew on Roses.

Mixing instructions: Half fill the spray tank with water. Add the required amount of **TYFOS 722SL** then fill the water to the required level and mix or agitate thoroughly to uniformity. Spray immediately after mixing.

ADVANTAGES OF TYFOS 722 SL

- 1. Excellent control of soil-borne and foliar oomycete diseases** such as Pythium and Phytophthora spp.
- 2. Systemic activity**, moving upward in the plant to protect new growth
- 3. Strong preventive action**, especially effective when applied early
- 4. Protects roots, stems, and foliage**, reducing damping-off and root rot
- 5. Improves plant establishment and vigor**, particularly in seedlings and transplants

PROPAMOCARB HYDROCHLORIDE 722G/ L

Category	Information
Site of Action	Proposed as affecting cell membrane permeability, by inhibiting fatty acid biosynthesis.
Spectrum and Route of Action	Systemic fungicide with protective activity, absorbed by roots and leaves, translocated acropetally in the xylem. Reduces mycelial growth and development of sporangia and (zoo)spores.
Uses (Crops & Diseases)	<p>Tomatoes: Phytophthora infestans (late blight)</p> <p>Potatoes: Phytophthora infestans (late blight)</p> <p>Lettuce: Bremia lactucae (downy mildew)</p> <p>Cabbages: Peronospora spp. (downy mildew)</p> <p>Cucurbits (cucumber, melon, squash): Pseudoperonospora cubensis (downy mildew); Phytophthora spp.; Pythium spp.</p> <p>Turf: Pythium aphanidermatum (Pythium blight)</p> <p>Ornamentals: Pythium spp., Phytophthora spp. (root and stem rots)</p> <p>Peppers: Pythium spp., Phytophthora spp.</p> <p>Vegetables (various): Pythium spp., Phytophthora spp.</p> <p>Vegetable Seedbeds: Pythium spp., Phytophthora spp. (damping-off and root rots)</p>

AVAILABLE PACKS

50 ml, 100 ml, 250 ml, 500 ml, 1 L, 5 L & 20L
