

VISION 40 SC

PYRIMETHANIL 400G/ L

FRAC (Fungicide Resistance Action Committee) code: Pyrimethanil 400g/L: 9

Description: **VISION 40 SC** (Pyrimethanil 400g/L) is a fungicide for control of Botrytis on Roses, Tomatoes, Onions and Carrots.

Mixing instructions: half fill the spray tank with water. Add the required amount of **VISION 40 SC** then fill the water to the required level and agitate thoroughly to uniformity. Spray immediately after mixing.

ADVANTAGES OF VISION 40 SC

1. **Broad-spectrum control of key fungal diseases**, especially Botrytis (grey mold), Monilinia, and Alternaria spp.
2. **Strong preventive and early curative activity**, stopping infections at early stages
3. **Systemic and translaminar action**, ensuring protection of new and hidden plant tissues
4. **Effective at low temperatures**, making it ideal for early-season and cool-weather applications
5. **Long residual activity**, reducing the number of applications needed

PYRIMETHANIL 400G/ L

Category	Information
Site of Action	Inhibition of methionine biosynthesis, resulting in inhibition of the secretion of hydrolytic enzymes necessary for plant cell wall degradation and subsequent fungal infection.
Spectrum and Route of Action	Contact fungicide with protective and curative activity, translaminar mobility.
Uses (Crops & Diseases)	Vines: Botrytis cinerea Soft fruit (e.g. strawberries): Botrytis cinerea Vegetables: Botrytis cinerea Ornamentals: Botrytis cinerea Pome fruit (apples, pears): Venturia inaequalis, Venturia pirina Apples (post-harvest): Penicillium expansum

AVAILABLE PACKS

50 ml, 100 ml, 250 ml, 500 ml, 1 L, 5 L & 20L
