

Bion

(A product of EU Origin)

Introduction

BION is a citrus extract fortified with Zinc and Manganese which helps to increase the immune system, enzymatic and photosynthetic of the the plants.

Product characteristics

- Systemic and Natural
- Polyvalent.
- Great Shock Effect.
- The Best Partner For Resistance Management.
- Optimize Spraying.
- No Security Term.
- LMR Excent
- Ideal For Integrated Production Programs Suitable For Ecological Agriculture.
- Zero residue.

Action

- Transported systemically to the entire plant
- Anti stress effect
- Miscible with almost all pesticides
- Induces systemic resistance

By improving these functions, BION helps plants:

- Develop stronger root systems.
- Increase resistance to stress and external agents.
- Improve overall growth and yield.
- Maintain better crop quality.

Application Guidelines

BION is suitable for a wide range of crops, including:

- Vegetables (tomatoes, peppers, cucumbers, lettuce).
- Fruits (grapes, strawberries, fruit trees).
- Cereals (corn, rice).
- Tubers and herbs
- Carnations, Roses and summer flowers.

Application Guidelines

Foliar Application (Preventive):

Dosage: 1 – 2 L/Ha (20 - 40ml/ 20Ltrs of water)

Ensures rapid nutrient uptake through leaves.

Root Application (Preventive): Dosage: 2 - 3 L/Ha

Enhances nutrient absorption via the root system.

Post harvesting 1.5 - 2.5ml / 1Ltrs (4 - 11kg fruit).

Best Practices for Use

- Apply during mild weather conditions to maximize absorption.
- Avoid application during periods of water stress, unless irrigation is available.
- Do not mix with fungicides, insecticides, or herbicides.
- Shake well before use to ensure proper formulation consistency.

SHAKE WELL BEFORE USE

- Read label for more details.
- Store in cool & dry place
