

# COPTER 50 WDG

COPPER HYDROXIDE 538G/KG (35% METALLIC COPPER EQUIVALENT)

**FRAC (Fungicide Resistance Action Committee) code: Copper Hydroxide: M01**

**Description: COPTER 50WDG** (Copper Hydroxide 538g/Kg (35% metallic copper equivalent)) is a broad-spectrum contact bactericide and fungicide for the control of Black spots and Botrytis on Roses.

**Mixing instructions:** half fill the spray tank with water. Add the required amount of **COPTER 50WDG** then fill the water to the required level and agitate thoroughly to uniformity. Spray immediately after mixing.

## ADVANTAGES OF COPTER 50WDG

1. Broad-spectrum **protective fungicide and bactericide** for many crop diseases.
2. **Multi-site mode of action** helps reduce the risk of resistance development.
3. Effective against a wide range of **fungal and bacterial pathogens**.
4. Provides strong **preventive disease control** with good surface coverage.
5. Suitable for use in **fruits, vegetables, ornamentals, and field crops**.

## AVAILABLE PACKS

50 G, 100 G, 250 G, 500 G, 1 KG, 5 KG & 25KG

## COPPER HYDROXIDE 538G/KG (35% METALLIC COPPER EQUIVALENT)

Category	Information
Site of Action	Copper ions chemically react, non-specifically, with thiols, hydroxyls, amines, etc. on proteins, thus disrupting the function of proteins and enzymes causing cell damage.
Spectrum and Route of Action	Non-systemic, foliar fungicide and bactericide with protective activity. Deposits must be on the crop before fungal spores begin to germinate.
Uses (Crops & Diseases)	Control of fungal and bacterial diseases in numerous crops.
