DEFENDER

INORGANIC FOLIAR FERTILIZER

SHAKE WELL BEFORE USE

Introduction

Defender is a natural organic product, capable of increasing the defense capacity of the plant.

Its composition, designed based on natural organic compounds of vegetable origin and selected micro-nutrients, stimulates a complete distribution throughout the whole plant and an immediate response from the plants's self-defense systems against external agents like Downy mildew, Phytophthora, Euphoria(in grapes), Citrophthora, Botrytis, Peronospora and mildew in vegetables.

Defender ideal for: -

- Vegetative growth stimulation.
- Corrective micronutrient support.
- Flowering and fruit set support.
- Stress management programs.
- Integrated crop nutrition programs.
- Plant defense / tolerance against fungus.

(N.B. This product is not a replacement of fungicides)

Advantages to Farmers

- ✓ Better nutrient efficiency.
- ✓ Greener and healthier crops.
- ✓ Improved yield potential.
- ✓ Better crop quality.
- ✓ Reduced stress impact.
- ✓ Compatible in crop nutrition programs.
