

MagHi

(LS)

MagHi (LS) is a highly concentrated liquid suspension fertilizer containing 500 g/L Magnesium Oxide (MgO) formulated for foliar application on all crops. It is designed to prevent and correct magnesium deficiencies by supplying a readily available source of magnesium essential for chlorophyll formation, photosynthesis, carbohydrate production and overall plant development.

Advantages (MagHi)

- 1. High Magnesium Concentration** – Contains 500 g/L Magnesium Oxide (MgO) for rapid correction of magnesium deficiencies.
- 2. Improves Photosynthesis** – Magnesium is the central component of chlorophyll, enhancing photosynthetic activity and energy production.
- 3. Enhances Crop Growth and Vigor** – Promotes healthy vegetative growth and stronger plants.
- 4. Boosts Yield Potential** – Improves carbohydrate production and nutrient utilization, resulting in higher yields.
- 5. Improves Fruit and Crop Quality** – Enhances fruit size, color, uniformity and overall marketability.

COMPOSITION

Magnesium(MgO)

w/v

500 g /L

Applications and Dosages

Foliar Applications

Crops	Dose & Application Stages
Vegetables	1-2 L/ha in 100 L minimum of water. Start application when temperatures go down and since the beginning of fruit settings until 15 days before harvest.
Grapes	1-2 L/ha in 200 L water. 4 applications starting from flowering then every 15 days. Adjust to 4 L/ha for stem bunch necrosis. Up to 3 weeks before harvest.
Ornamentals	1-2 L/ha at 15 days interval

AVAILABLE PACKS

50 ml, 100 ml, 250 ml, 500 ml, 1 L, 5 L & 20L
